

TABLE 2-1
SUMMARY OF DATA TYPES AND USES FOR THE ACOUSTIC DOPPLER CURRENT PROFILER SURVEY

Field Program	Summary of Proposed Activities	Data	Data Type	Data Uses
Field Observations	Observations by an on-site professional during all field activities.	Date Weather conditions On-site personnel Field activity type Samples collected/Details Unusual conditions encountered	Field Field Field Field Field Field	Project documentation
Acoustic Doppler Current Profiler Survey	Conduct Acoustic Doppler Current Profile survey at each transect within Lake Belton (refer to Plate 1).	Current profile at each transect GPS location of each transect	Definitive	Improve understanding of water flow patterns in Lake Belton and assess whether deep-water currents could provide a preferential flow path for perchlorate.
